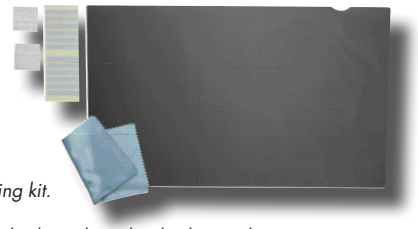
PRIVACY FILTER REFERENCE GUIDE

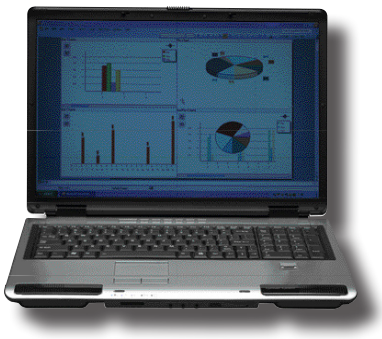
Thank you for purchasing this MANHATTAN® Privacy Filter.

By narrowing the field of view to approximately 45° from the display center, it effectively discourages glances from curious onlookers and prevents the disclosure of on-screen displays to information thieves. Once installed, the Privacy Filter also helps protect fragile LCD surfaces from scratches and minor damage, and can decrease eyestrain, glare and annoying reflections.



Privacy Filter with cleaning cloth and multi-option mounting kit.

The image at far right shows how the display on the monitor screen becomes more difficult to discern through the Privacy Filter as the view approaches a 45° angle, at which point the display becomes completely "private" for the user and indiscernible to others.

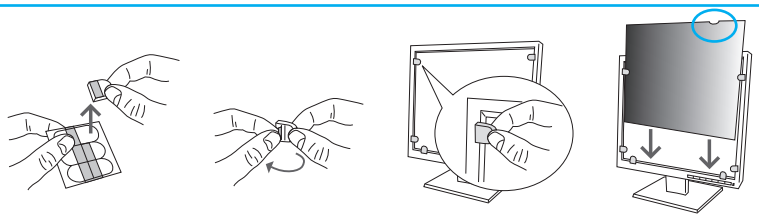


MOUNTING KIT INSTALLATION

IMPORTANT: For proper product performance, *do not* bend, cut or otherwise alter the size or shape of the Privacy Filter. *Do* clean your monitor screen with the enclosed cloth before positioning the filter, and *do* ensure the cutout appears at the top right as you face the filter when it's in place (as circled in blue in the Step 4 image below).

If your monitor screen is *larger* than the Privacy Filter, use the clear plastic tabs.

1. Separate the tabs.
2. Peel the protective cover from the adhesive.
3. Place the tabs along the bottom and sides of your monitor.
4. Slip the Privacy Filter behind the tabs so it covers the screen.



If your monitor screen is *smaller* than the Privacy Filter, use the adhesive strips (adhesive on both sides).

1. Remove the strips one at a time from the sheet.
2. Place the strips along the back edges of the filter so they line up with the monitor frame. ***NOTE:*** Be careful not to cover any control buttons.
3. Peel the remaining protective cover from the strips and press the filter in place on the monitor frame so it covers the screen.
